SOFT SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Problem-Solving Ability

LANGUAGES

- English
- Hindi

CERTIFICATES

- **Artificial Intelligence & Machine Learning Intermediate Leve l Certificate – Coding Spoon**
- Data Science - AI/ML Certificate of Achievement-Coding Spoon

SUMMARY

- Built an Image Classification web app using pre-trained deep learning models (ImageNet) with transfer learning.
- Implemented a Fake News Detection system using NLP techniques to classify news as fake or genuine.
- Designed and deployed Flask/Streamlit-based web interfaces for real-time model predictions.
- Applied text preprocessing, TF-IDF, and Bag-of-Words techniques for NLP-based classification.
- Worked with Python libraries including Pandas, NumPy, Matplotlib, and Scikit-learn for data analysis and modeling.
- Gained hands-on experience in machine learning, deep learning, and transfer learning concepts.

EDUCATION BACKGROUND

- B.TECH in Computer Science(AI)

Chhattisgarh Swami Vivekanand Technical University — 2023-2027

- I.Sc(Math)

Samastipur College Samastipur, Bihar — 2021-2023

- **10Th**

High School Bhagwanpur Desua, Samastipur, Bhihar — 2020-2021

PROJECT

1.Fake News Prediction

- Technologies:Python, Scikit-learn, NLP, Machine Learning
- Designed a machine learning system to detect and classify fake and real news articles.
- Applied NLP techniques to preprocess and clean raw news text data.
- Used TF-IDF and Bag-of-Words methods for text feature extraction.
- Trained multiple machine learning classifiers to improve prediction accuracy.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics

- Hack2Skills Hackathon Participation Certificate – 2025

TECHNICAL STRENGTHS

- Python programming and problem-solving
- Machine Learning and Data Analysis using Pandas, NumPy, Scikit-learn
- Web development using Flask (creating interactive web apps)

2.Image Classification Using Pre-trained Model

- Technologies:Python, TensorFlow / PyTorch, Pre-trained CNN (ResNet / VGG / MobileNet), Deep Learning.
- Developed an image classification web application using pre-trained deep learning models trained on large-scale datasets such as ImageNet.
- Implemented transfer learning to classify images across thousands of object categories with high accuracy.
- Integrated the trained model with Flask / Django / Streamlit to provide an interactive and user-friendly interface.
- Built end-to-end workflow for image upload, preprocessing, inference, and result display.
- Optimized inference performance for real-time predictions.

TECHNICAL SKILLS

- **Languages: Java, Python, JavaScript**
- **Web Development: ReactJS, NodeJS, HTML, CSS**
- **Frameworks: Numpy, Pandas, Matplotlib, Seaborn, TensorFlow, PyTorch, Streamlit**
- **Databases: SQL, MySQ, SQLite, Data cleaning/Preprocessing**
- **Tools: Git, GitHub, pyCharm, VS Code, Jupyter Notebook,**
